

Unlock Seamless POS Control with SICC for Senior Living

ServingIntel's SICC, the POS control system, empowers users with comprehensive features such as menu management, maintenance updates, and robust reporting capabilities. With cloud-based architecture, users can access the POS back-office from any device, ensuring convenient and efficient management of transactions from any location.

COMPREHENSIVE FEATURES

- ✓ **Accessibility:** ServingIntel Cloud Control (SICC) offers accessibility from anywhere with any device that has an internet connection. Staff can use mobile devices to update menus, run reports, and access resident information, improving efficiency, and customer service.
- ✓ **Remote Management:** ServingIntel Cloud Control (SICC) makes menu management extremely efficient for adding or removing items, modifying prices, updating dietary restrictions, and are instantly reflected across all POS terminals and online platforms.
- ✓ **Seamless Integration:** ServingIntel Cloud Control (SICC) integrates with eCommerce (online ordering), eServer (QR Codes), eConnect (GrubHub, DoorDash, etc.) & eKiosk (Self-Service Ordering).
- ✓ **Real-Time Reporting and Analytics:** ServingIntel Cloud Control (SICC) provides real-time reporting and analytics capabilities from any device. Administrators can instantly access sales data, resident transaction history, staff performance, and other key metrics to help identify trends.
- ✓ **Scalability and Flexibility:** ServingIntel Cloud Control (SICC) provides scalability and flexibility to accommodate the changing needs of Senior Living communities, like the number of residents, dining venues, and services offered.
