# Empower Residents with the Flexibility of Online Ordering

ServingIntel's eCommerce solution empowers residents with a mobile-friendly ordering website that allows them to order meals for pickup, delivery, or dine-in. Orders automatically flow into the POS system allowing for seamless integration and maximum efficiency.

COMPREHENSIVE FEATURES

☑ **Convenience:** Empowers residents and/or employees to order from any personal device that has an internet connection such as phones, tablets, or PC.

☑ **Timely Service with Scheduled Pickup/Delivery:** Online Ordering minimizes wait times and ensures residents receive their orders promptly.

☑ **Menu Flexibility:** Online Ordering can offer various menu choices, similar or separate to the restaurant's traditional menu.

☑ **Streamlined Operations:** Online Ordering streamlines the overall operations of Senior Living communities by automating order management, reducing manual tasks, and allowing staff to focus on providing excellent service.

☑ **Health and Safety:** Particularly in times of health emergencies, Online Ordering offers a no-contact option for residents to still receive healthy, delicious meals and enhances the over-all safety within the community.
